LEGAL INFORMATION

The driver of the vehicle should not be inferred from the motion images. In many countries, watching movies while driving is prohibited. Therefore we accept no responsibility for material or personal injuries, directly or indirectly, due to installation of the interface modules.

Interface and Software basic information:

The NavInc interfaces are no navigation systems or screens to replace the navigation system. The NavInc interfaces enable the possibilities to connect different Audio/Video sources to the navigation system.

Manufacturers create adjusted software and hardware versions, options and enhancements which ensures that the compatibility of the products cannot be guaranteed 100%. Compatibility lists are based on customer feedback and experiences and will constantly be updated for optimal customer support.

COMPATIBILITY

CAR

This kit is compatible with the following models:

Tesla

Model X

Model S

Note:

- It is essential to have an Aux-in when using multimedia source via Bluetooth A2DP
- Connection for audio via smartphone bluetooth can have a slight delay between sound and video
- Audio via FM simulator do not have delay but quality is not that good
- When running video or games applications via mobile phone, it can drain the phone battery because of exceeding charge rate.
- We recommend that the installation will be performed by a qualified specialist

REQUIREMENT

AUDIO	The interface inserts ONLY video signals into the infotainment. It is essential to have an Aux-in, when using audio from an external AV source.
HDMI	Support standard HDMI video sources up to 1080p
SCREEN	Interface is compatible with 17" monitors
INSTALLER	We recommend that the installation will be performed by a qualified specialist
