

NAVmusic

music integration

DESCRIPTION

The Bluetooth car kit interface simulates the CD-changer of Porsche via Fiber Optical system (MOST). Due to the interface it is possible to control the telephone through the original radio or navigation system and the steering wheel control buttons of the car. The address book and telephone numbers will be displayed on the radio/navigation display. The car kit is equipped with the latest generation Bluetooth chipset which enables the most modern telephones to connect through Bluetooth with the original system.

Besides the Bluetooth car kit it has also the possibility to play music via bluetooth streaming, USB, SD-card and AUX.

Features

- Carkit hands-free function via original system
- Phone book support (see table)
- Steering wheel button support
- Bluetooth Audio streaming support
- USB support (MP3 & WMA)
- SD-card support (MP3 & WMA)
- App audio support (music & navigation)
- Easy menu for music & menu browsing
- Phone charging via USB (max 300mA)
- Support control functions like; PLAY, PAUSE, NEXT, PREV, FF, REW

EXCLUSIVE INTERFACE FEATURES

COMPATIBILITY

Head-unit

Suitable for the following radio- navigation system:

Radio system	Notes
PCM2.0 - BE6632	Support phone book list & ID3 tag
PCM 2.0 - BE6642	Support phone book list & ID3 tag
PCM2.0 - BE6654	Support phone book list & ID3 tag
PCM 2.1 - BE6692	Support phone book list & ID3 tag
PCM 2.1 - BE6693	Support phone book list & ID3 tag
CDR23 - all versions	not support phone book list & ID3 tag
CDR24	not support phone book list & ID3 tag

PCM 2.0 - BE6632

PCM 2.0 - BE6642

PCM 2.0 - BE6654

PCM 2.1 - BE6692

PCM2.1 - BE6693

CDR23 – all versions

CDR24

REQUIREMENT

OEM CD CHANGER	Must be removed when installed (use a loop connector - optional)
OEM BT CARKIT	Must be removed when installed (use a loop connector - optional)
OEM MOST	The Optical input of the head-unit must be activated (optical input is activated with following OEM options: BT-carkit/CD changer/TV tuner/Bose Amplifier)
SIMULATION	Interface simulates OEM CD changer
USB	Support USB stick version 1.1 - 2.0 (max 32GB) - MP3 & WMA files only - max 5 folders with 999 music files - support iD3 tag
SD CARD	Support micro SD card (max 32GB) - MP3 & WMA files only - max 5 folders with 999 music files - support iD3 tag
BLUETOOTH	Support audio streaming - support iD3 tag
INSTALLATION	We recommend that the installation will be performed by a qualified specialist
EXTRA NOTE	After removing the OEM Bluetooth carkit module it is possible that your PCM gives an error code like; "Phone not available". In this case the OEM Bluetooth carkit option need to be decoded in the software by Porsche.
