Additional information:

- Check at the tab "compatibility" on top of this page if your radio or navigation system is suitable for this product.
- Audio of the connected video source must be linked to the AUX input of car, FM modulator, USB or iPod interface.
- No constant voltage needed (+30) therefore the interface is much more stable.
 - "Mute" function for the video inputs which are not used.
- Use of a metal casing and new components (not Chinese or remanufactured components).
