

## **PARDUS Power Pedal Pro 3.0 - kit**

**Art. Nr:** PAR-FCI-KIT

---

### **DESCRIPTION**

---

The new PARDUS PRO 3.0 POWER PEDAL for improved acceleration and a more agile response. With the innovative accelerator tuning from Panthera you can choose from seven different driving profiles - from valet mode to race mode to track mode.

In addition to the driving profiles, the new accelerator tuning has a lock mode. This mode protects you against theft with the help of a complete deactivation function of the accelerator pedal by entering a password.

The new module is also ideally suited for use with naturally aspirated engines.

#### **Features**

- Better acceleration
- Faster response
- 8 profiles different profiles
- Pedal "Lock" Mode included
- APP control
- Easy installation with Plug and play connectors
- TÜV approved
- Highest Quality
- Support the latest SENT Technology

## **EXCLUSIVE FEATURES**

---

Driving profiles and lock mode at a glance:

1. Kids mode - extreme reduced response
2. Vallet mode - very reduced response
3. Eco mode - consumption-optimized response
4. Sport mode - slightly increased response
5. Race mode - increased response
6. Race + mode - strong increased response
7. Track mode - maximum response
8. Lock mode - protection against theft

The seven driving profiles of the PARDUS PRO 3.0 Power Pedal can also be modified with 4+ and 4- fine tuning levels.

## **POWER PEDAL APP**
