
DESCRIPTION

This interface enables to connect an external audio source, such as an iPod / MP3 player / DVD player / Telephone, to the MMI system of Audi. The audio input will be displayed as an optical AMI.

The interface can be mounted in combination with the OEM carkit.

Input of the interface is 2x RCA (audio RCA left & audio RCA right) and integrated Bluetooth. The analog signal will be converted to an optical audio signal (fiber optic) which makes sure the audio quality is equal to an original CD changer.

Features:

- Connection via CAN
- Audio Bluetooth streaming via A2DP
- Skip numbers via MMI button (Bluetooth)
- Display of track info
- Audio in stereo
- Activation of adapter via AMI level
- Audio input: 2x cinch connection

PACKAGING**The following will be supplied:**

- Audio interface BT2-AUDI-RNSE
- Installation manual
- 2 years warranty
- Invoice

NOTES

- Check tab 'Compatibility' to see if the interface is suitable for your radio-and/or navigation system
