

NAVmusic

music integration

DESCRIPTION

The Bluetooth car kit interface simulates the CD-changer of Landrover & Jaguar via Fiber Optical system (MOST). Due to the interface it is possible to control the telephone through the original radio or navigation system and the steering wheel control buttons of the car. The car kit is equipped with the latest generation Bluetooth chipset which enables the most modern telephones to connect through Bluetooth with the original system.

Besides the Bluetooth car kit it has also the possibility to play music via bluetooth streaming, USB, SD-card and AUX.

Features

- Carkit hands-free function via original system
- Steering wheel button support
- iD3 tag support (see table)
- Bluetooth Audio streaming support
- USB support (MP3 & WMA)
- SD-card support (MP3 & WMA)
- App audio support (music & navigation)
- Easy menu for music & menu browsing
- Phone charging via USB (max 300mA)
- Support control functions like; PLAY, PAUSE, NEXT, PREV, FF, REW

EXCLUSIVE INTERFACE FEATURES

Vehicle Integration:

- Controls via the original steering wheel control buttons
- Controls via the radio system
- Accept and reject incoming calls and terminate calls via Comand and steering wheel control button
- Display of conversation on navigation display
- Volume adjustment via steering wheel control buttons and radio system
- Automatic mute switch/support
- Audio of conversations via the original audio system

Media:

- A2DP audio streaming via Bluetooth
- AVRCP control of the telephone via the original buttons of the Comand system**
- USB support (up to 32GB)
- SD-card support (up to 32GB)
- AUX input via 3.5mm jack

NOTES

- We recommend that the installation will be performed by a qualified specialist
- Check also the other tabs for "Compatibility" - "Package contents" - "Product specifications"
