- iPAS option (moveable grid lines)
- Adjustubele parking lines via OSD menu
- 3 Year warranty & Support

EXCLUSIVE INTERFACE FEATURES

Features:

- Reverse Camera input
- Front camera input
- Image retention while driving
- Adjustable parking lines
- OSD menu

CAMERA FEATURES

Rear camera input with Parking guidelines

Rear camera input with parking guidleines option.

The guidelines makes it much easier to determine the distance to the object you are driving towards.

The guidelines are adjustable horizontal as well as vertical so the lines can be adjusted to the car.

Ajustable guide lines

Front camera input

Front camera input which will be selected after leaving the reverse gear. Via the OSD menu you can select show time:

3 sec

5 sec

10 sec

15 sec

NOTES

- We recommend that the installation will be performed by a qualified specialist
- Check the other tabs for "Compatibility" "Package contents" "Product specifications"

LEGAL INFORMATION

The driver ofthe vehicle should not be inferred from the motion images. In many countries, watching movies while driving is prohibited. Therefore we accept no responsibility for material or personal injuries, directly or indirectly, due to installation of the interface modules.

Interface and Software basic information:

The NavInc interfaces are no navigation systems or screens to replace the navigation system. The NavInc interfaces enable the possibilities to connect different Audio/Video sources to the navigation system.

Manufacturers create adjusted software and hardware versions, options and enhancements which ensures that the compatibility of the products cannot be guaranteed 100%. Compatibility lists are based on customer feedback and experiences and will constantly be updated for optimal customer support.

REQUIREMENTS

The interface inserts ONLY video signals into the infotainment. It is essential to
have an Aux-in, when using audio from an external AV source.
Only compatible with NTSC sources.
Interface is compatible with 8.8", 10.1", 12,3"& 15" MIB monitors
The front camera input will automatically switch after leaving the reverse gear.
You can set the display time in seconds via the OSD menu (1-15 sec).
It is also possible to select the FRONT camera input manually
The interface does not switch back automatically to the OEM rear camera input
when the reverse gear is engaged.
iPAS & Static lines are available via the interface OSD menu
iPAS option is available (moveable grid lines)
PiP option is available for original parking sensor overlay (Picture in Picture)
When interface won't respond on reverse CAN, please use the 12V reverse
detection wire (grey wire)
We recommend that the installation will be performed by a qualified specialist
PiP function = splitscreen or Picture in Picture, depending on car model
