

Wireless CAN bus data reader is a sniffer for easy and safe reading of signals from CAN (up to 1Mbit)

The WCAN is a universal plug and play solution for wirelessly reading data traffic on a CAN Bus. With its compact and clever design it is easy to install by pressing the cables in the designated slots.

Due to its wireless connection, no physical connections to the Car CAN bus cables is required and the WCAN does not influence the CAN bus data traffic. This ensures that car warranty is not voided.

Features

- No physical wire to wire connections required
- No soldering, wire cutting or crimping required
- Does not void vehicle warranty Quick and easy installation
- Extremely compact
- Universal and brand independent
- No CAN bus intrusion or interference
- Ensures safe CAN bus data reading
- LED status feedback
- Lowest current consumption on the market with < 1mA sleep mode
- Compatible with 1Mbit high speed CAN traffic
